Art Unit: 3617

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to a cast spoked wheel, classified in class 301, subclass 65.
  - II. Claims 10-16, drawn to a method of casting a wheel, classified in class 164, subclass 113.
  - III. Claims 17-21, drawn to an apparatus for producing a wheel, classified in class 164, subclass 340.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the wheel as claimed can be formed by another materially different process such as using a set of dies which are movable by a means other than a cylinder, or by using a single die, or even by forging.
3. Inventions I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the wheel as claimed could be made by an apparatus comprising two movable dies, or only one die, or a die in which the movable die is moved by a means other than a cylinder -- such as by hand.

Art Unit: 3617

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claims 1, 8, and 9 are generic to a plurality of disclosed patentably distinct species comprising wheels having the different spoke cross sections shown in figures 5-9. Claim 2 appears to read on the embodiment shown in figure 7.

If additional claims are presented which are specifically drawn to more of the different embodiments of the wheel spoke, then Applicant will be required under 35 U.S.C. 121 to elect a single disclosed species.

6. A telephone call was made to Mr. Peter Olexy on January 6, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3617
